Missouri Department of Transportation
Transition Plan Update in
Compliance with the
Americans with Disabilities Act, Title II Requirements

August 1, 2010

Executive Summary

The purpose of this document is to update the "Transition Plan for the Missouri Highway and Transportation Department," July 20, 1992. It has been developed to fulfill the requirements of the Americans with Disabilities Act of 1990, Public Law 101-336 under the implementing regulation for Title II, 28 CFR Part 35 35.150(d).

The Americans with Disabilities Act (ADA) requires public entities with more than 50 employees to conduct a self-evaluation and to develop a transition plan that identifies all structural modifications necessary to achieve program accessibility, describe the methods intended to make the modifications, specify a schedule for completion of the modifications and identify the official responsible for implementation of the plan.

In the summer of 2007, the Missouri Department of Transportation (MoDOT) began an inventory of the current public facilities. All facilities for use by the public including District and Central Office buildings, welcome centers and pedestrian facilities were evaluated to determine their compliance with the standards set out by the ADA.

In November of 2008, an ADA Collaboration Team was developed to assure that Construction and Design Division and District staff work together to determine clear priorities, methods and a schedule to update MoDOT's Transition Plan. The Missouri Division of the Federal Highway Administration (FHWA) also participated as part of the team.

It is anticipated that the facilities identified in this plan will be upgraded in accordance with the ADA by 2027. This date is contingent upon funding levels and the ability to schedule the work in future projects. MoDOT and FHWA agree to re-evaluate both progress and the anticipated completion date approximately every five years. District and Central Office management will be allowed to determine the most effective and efficient methods to complete the needed work, giving consideration to the priorities stated in this plan.

Using 2008 costs, the modifications are expected to exceed $150 million. Because expenditures are planned in accordance with the Statewide Transportation Improvement Plan (STIP) most of the funding available through the 2015 STIP has been committed and improvements will be made on projects where possible. Beyond the 2015 STIP, it is expected that districts will make progress toward the completion of the necessary upgrades each year.

MoDOT uses an organizational performance measure known as the Tracker to assure that the department is accountable in meeting goals that support its Tangible Results and Values. ADA compliant program and facility access closely mirrors the department's "Environmentally and Socially Responsible" tangible result and will be tracked under this category. Each district will also be tracked to ensure satisfactory progress through the completion of the Transition Plan.

2010 Transition Plan

Responsibility and Intent

The Missouri Department of Transportation (MoDOT) respects the rights of all those who use state transportation facilities and accepts the responsibility of providing equal access to all users. With this in mind, it is the goal of the department to upgrade MoDOT owned facilities to which the public has access to comply with the Americans with Disabilities Act. This document is an update to the Transition Plan completed in July, 1992 in accordance with the Americans with Disabilities Act of 1990, Public Law 101-336 under the implementing regulation for Title II, 28 CFR Part 35 35.150(d).

Commitment

This Transition Plan represents the department's intent to upgrade existing facilities over a 17-year period reaching completion by 2027. MoDOT maintains over 33,000 miles of roads and nearly 10,000 bridges. As these roads and bridges undergo alterations, the pedestrian facilities associated with them will be brought into compliance with current ADA standards. Additional improvements will be made with separate projects and internal work forces to complete the plan in a timely manner. MoDOT owned buildings to which the public has access will be upgraded by 2015 and have been prioritized by the degree of public use for each building.

Limitations

Many challenges exist in reaching full compliance with the ADA. All of the work will occur as alterations to the existing right of way and building facilities. Working within the limits owned by MoDOT, and completing construction within the physical constraints of each project or facility may at times force MoDOT to rely on providing compliance "to the maximum extent feasible" when it becomes technically infeasible to accomplish a fully compliant solution. Every effort will be made to remove all barriers and provide easy access to the transportation facilities over which the department has control. In addition, attempts will be made to work with other public right of way owners and adjacent property owners to determine the best solution for each area.

Development of the Transition Plan Update

Pedestrian Facilities on the Public Right of Way

In the summer of 2007, districts began determining the ownership of sidewalks, crosswalks and traffic signals along state owned and maintained roads. Where it was thought that MoDOT is the party responsible for upgrade of the facilities, an inventory of features was completed and entered into a statewide database. In the winter of 2008, an evaluation of the data was completed and the costs to bring the facilities into compliance were estimated. MoDOT acknowledges that some facilities may have been overlooked or counted by mistake. If it is determined that items need to be added to or removed from the inventory, the plan will be corrected as needed. Actual ADA improvements will be determined by the condition of the facility at the time of the project and absence from the inventory will not exempt work from being completed.

The inventory and estimates were reviewed by the districts to determine which items might be upgraded as part of the current Statewide Transportation Improvement Plan (STIP). The STIP is a commitment to the public of the projects planned to be completed during a 5-year timeframe. The first three years of the STIP are fully programmed within the limits of the estimated budget. The later years are not fully programmed and project scope and estimate changes can be made more easily. Inventory items that are not included within a current STIP project will be completed in one of the following ways:

- Future STIP project
- Stand alone project to be completed with contract labor
- Internal forces such as special crews or maintenance staff
- Improvements made by others such as local agencies and work done by permit

Pedestrian Facilities Priorities and Implementation

It is the responsibility of district management to determine the most efficient and effective means of using the resources available to them, both financially and through staff management, to accomplish the many tasks for which they are held accountable. Given this basic department structure, district management will determine the best methods to correct ADA deficiencies within each district. Public input, with an emphasis on identifying and including disabled populations, will be sought out to provide input into district prioritization decisions. In making these determinations the decisions will be based on balancing the following priorities:

Locations:

1. High risk areas, based on crash data and safety concerns
2. High volume public use areas, and accessibility needs areas
3. STIP projects
4. Public requests
5. Corridors and high volume use areas

Focus areas:

1. Removal of barriers, such as curbs
2. Intersections
3. Other accessible routes and sidewalks

Pedestrian Facilities Schedule

It is anticipated that to complete the necessary improvements required by the ADA will take 17 years, beginning with current projects in 2010 and reaching completion by 2027. During this time, MoDOT will have performed maintenance or reconstruction on most of the right of way included in the survey. In addition, funding provided in the next three federal highway bills can be identified for use to make the necessary system improvements.

The full cost of compliance exceeds $150 million. This cost does not include inflation, right of way purchases or easements, or the cost of utility relocations. These additional costs may affect the proposed timeline. Items included in projects in the current 2011-2015 STIP will be completed with the projects where possible. Remaining items will be

completed with one of the methods discussed above and the district management staff will be held accountable for making progress each year.

A copy of the District Right of Way Inventory is attached as Appendix A and includes information on the compliance of sidewalks, intersections and traffic signals.

Building Facilities

MoDOT maintains many buildings and grounds across the state, from office buildings to welcome centers to maintenance sheds. It is important that those buildings used by the public are made accessible in accordance with the ADA. In the summer of 2008, MoDOT building facilities were inventoried in much the same way as the pedestrian facilities. A database was developed and estimates for ADA compliance were determined.

Building Facility Priorities and Implementation

Again, district management, working with General Service's management, is responsible for prioritization of the needs within their districts. The degree of public use will be the determining factor in prioritizing the upgrades in each district. The buildings have been divided into the following three groups:

Priority One – high volume public use areas such as welcome centers and offices
Priority Two – occasional public use and employee work areas
Priority Three – employee only work areas as needed

MoDOT maintenance buildings that are used to store and maintain equipment are not open to the public and have been excluded from the inventory. They do not provide programs, services or activities to the public and are restricted to authorized personnel only.

Building Facilities Schedule

Correction of building facilities is expected to cost nearly $2 million and take 5-6 years to complete with the funding that is anticipated to be available. The funding will be part of the department's capital improvements budget.

A copy of the District Building Inventory is attached as Appendix B and includes compliance information on MoDOT owned buildings.

Public Comment

The public will be invited to review and comment on this Transition Plan. It will available at the Central Office in Jefferson City and at all District Offices between the dates of August 1, 2010 and August 31, 2010. It will also be available on MoDOT's website and a virtual public meeting will be held. The disabled community will be specifically notified of its availability and will be encouraged to provide comment. Those comments will be taken under consideration and incorporated into the plan where appropriate.

Accountability
MoDOT is accountable to the citizens of Missouri and maintains a transparent method of doing business. As documentation of the department's effort to improve operations and meet the needs of the traveling public, an organizational performance measure known as The Tracker has been developed and is available on the internet. The Tracker is used to assure that the department is accountable in meeting goals that support it's Tangible Results and Values. ADA compliant program and facility access closely mirrors the department's "Environmentally and Socially Responsible" tangible result and will be tracked under this category. Each district will also be tracked to ensure satisfactory progress through the completion of the Transition Plan.

Inventory Maintenance
Each district will be responsible for maintaining its' ADA inventory. As items are completed, they will be noted in the database and the cost will be subtracted from the total amount of work to be done. If it has been determined that an item has been brought into compliance to the maximum extent feasible, or that it is technically infeasible to bring the item into compliance, the decision will be documented and the item will be considered complete in the database.

Responsible Person
Lester Woods, External Civil Rights Director, will be the responsible party for this document and its implementation.

Notification of Concerns
Complaints or concerns that a program, service, or activity of MoDOT is not accessible to persons with disabilities should be directed to Mr. Lester Woods, External Civil Rights Director, at 573-751-2859.

Public Comments for MoDOT's Transition Plan

The Transition Plan was posted on MoDOT's website from September 13, 2010 until November 8, 2010. A link was available on the home page during this time. In addition, efforts were coordinated with the Governor's Council on Disabilities to inform, through the use of list servs, organizations representing people with disabilities that the webpage was available and comments were appreciated. A reminder email was sent to the same organizations two weeks prior to closing the website.

The following information was posted on the webpage:

Proclamation of Recommitment to Full Implementation of the ADA, signed by Kevin Keith, Director of MoDOT

Missouri Department of Transportation Transition Plan Update in Compliance with the Americans with Disabilities Act, Title II Requirements

Appendix A, District Right of Way Inventory

Appendix B, District Building Inventory

Surveys were also included as part of the web page. One was developed to identify general disability needs and concerns and another was to identify individual locations where people encountered obstacles. A location map was the preferred method to identify locations, but a Survey Monkey text survey was used to collect the same information from those that were unable to use the mapping application. All location information was converted to the map so that it could be easily shared with MoDOT district staff and because the locations were not restricted to state system roads, it will also be made available to local agencies. The information collected will be used as a resource for the districts in making decisions on how to prioritize and plan implementing the Transition Plan.

During the comment period there were 958 unique views to the site. The Accessibility Survey was taken by 204 people and 19 provided additional information using the Location Survey. Comments were received from 13 people.

Public comments were addressed by Melissa Anderson, Non-motorized Transportation Engineer, as they came in. Commenters who included contact information received responses. Comments and responses are available upon request. Comments primarily concerned policy and personal location issues. No adjustments to the Transition Plan were necessary based on the comments received.

District Right of Way Estimate Summary

Appendix A

Estimated Costs to Remove Obstacles	
District 1	$833,857
District 2	$25,764,810
District 3	$2,126,244
District 4	$28,332,686
District 5	$10,108,753
District 6	$35,125,552
District 7	$17,769,263
District 8	$17,637,594
District 9	$5,474,384
District 10	$11,591,443
Total	**$154,764,585**

Comments: How come your appendix a does not include all roads for which modot is responsible - Missouri Lettered Routes for example. You have just as much responsibility for all routes, not just those based on major routes. For example there's not inventory for highway k in Boone County. Most rural routes are not listed.

Comments: This improvement is long overdue. When the Fed or State Gov select a site to serve the public, why doesn't MoDot automatically address its needs?

Comments: The Whole Person, a Center for Independent Living in Kansas City, appreciates the opportunity to comment on MoDOTs transition plan. We connect people with disabilities to the resources they need, and transportation is essential to accessing employment and all other aspects of daily living. The Whole Person is in favor of MoDOTs plans to prioritize making all its public buildings accessible according to frequency of use and to the greatest extent possible by 2015, many years in advance of the plans 2027 end date. We are also pleased at MoDOTs efforts to put the needs of the public ahead of bureaucratic considerations by committing to improve its sidewalks, traffic signals and intersections regardless of inventory errors which may have occurred in 2007 surveys. We are appreciative of efforts to increase input from people with disabilities as improvements are added following the initial three years of set and budgeted upgrades, including high risk areas, high volume public use areas, accessibility needs, public requests, and removal of barriers, intersections and sidewalks. The Whole Person applauds prioritization based on degree of public use, however, also encourages request processes to be utilized. We appreciate the accountability and tracking measures MoDOT is undertaking. The Whole Person has a concern with permanently removing items for upgrade which are currently deemed not feasible, as future circumstances or new remedies could make reassessment a more feasible option, thereby increasing accessibility to MoDOTs programs, services and facilities for all, including people with disabilities and older Missourians.

Comments: As a person with a visual disability, the parts of Missouri transportation that impact me are those of public transportation and access to pedestrian paths of travel. Many small towns in Missouri depend on county and state roads that were built without sholders, bike path lanes or sidewalks. This does a disservice to people who need to get around these communities on foot or using wheelchairs. When a state route passes through a community, it should be wide enough for bike lanes or pedways. My second concern centers on audible traffic signals. Two years ago a bill was presented to bring St. Louis on the system of being able to turn left on a red light if the driver was moving on to a one way street. This legislation was included in a budget bill and passed last legislative session. Without an audible traffic signal so that visually impaired pedestrians begin to move when the light changes, a blind pedestrian has to wait until the surge of parallel traficc occurs. By then, a driver wishing to make the turn is looking away from them in order to merge when the blind person begins to move. Such intersections become extremely dangerous for a visually impaired person without the same information as a person with sight. Although your transition plans are a good start, additional safety and access measures need to be included in all future MODOT projects.

Comments: I find an executive summary and two inventories. Is this all there is? If so, it is woefully inadequate. There is no information about what constitutes "accessible" (I see many items listed as compliant that are not). I see almost no information on phasing. I suspect that most folks who look at this find it almost impossible to find anything to comment on.

Hello Ms. Wallen,

Thank you for your comment. There seem to be mixed feelings about the use of audible signals among blind travelers, so we try to put them where we know they are wanted. I will follow up with our St. Louis area staff to see if there is a reason for the delay with the Creve Coer project.

I encourage you to complete the location survey to let us know specific areas where you the audible signals would be a benefit. If you have already done so, thank you. If you have any problems or additional questions, please do not hesitate to contact me directly.

Thank you,
Melissa

Comments: my biggest concern is for the installation of APS audible pedestrian signals to air the visually impaired. We have had some installed but it has taken years. The city of Creve Coeur approved some funding over a year and a half ago and MODOT had agreed to install yet we still wait. The ones that have been put in have taken up to five years and are not installed correctly or being maintained as they should so often do not work. My concern is that that when it comes to these signals MODOT will focus only on areas with high blind populations or facilities serving the blind rather than at the bigger picture. blind and visually impaired persons do not all live or work in one region and many of the intersections in other areas are far more important to those outside of these areas. They need to be in

key locations and are a part of total accessibility yet the laws and regulations on them are sorey overlooked. We also need the poles and turn lanes to be in the right place in order to help with the use of said signals. This is my number one concern over any others and the blind and their needs have been overlooked by MODOT for years.

Subject: Re: ADA Transition Plan Comments - Transit Funding

Chuck:

One of MoDOT's financial managers summed it up best when he said, "MoDOT is a transportation department that is funded like a highway department". What he meant by that is MoDOT's state gas tax funding is strictly regulated by the Missouri Constitution to be applied to only roads and bridges.

MoDOT cannot move state gas tax money from roads and bridges to public transit as a result of this constitutional limitation.

When there have been cuts in state transit funding, that has been as a result of actions NOT by MoDOT, but from reduced appropriations by the Missouri Legislature and/or the "withholdings" or state budget "restrictions" imposed by the Governors.

So, the next time you see your Missouri state senator or state representative, let them know your concern for state transit funding.

If you ever have comments or concerns about our state road projects, seriously, let me know. I work directly with the local office staff and can bring problem areas to their attention. We would like to be able to make everything accessible on every project. Our districts are finally realizing it is a priority, but funds are limited, so we have to figure out where improvements are needed the most and stretch our money as far as we can.

Thank you again,
Melissa

Thanks. I know the ropes. I went to law school but do not practice.

I got one thing changed on a state highway a few years ago.

State and federal monies went into some of these projects. The pavement contractor is continuing to flout the law and getting by with it. Two cities are ignoring it. I'm not done. I just

had to recover from some injuries I sustained in a serious (non-transportation-related) accident.

We lived through a long period of non-enforcement of the ADA, so, really, agencies and companies alike owe some back dues in my view.

You'll be able to see me most any day during session in the State Capitol.

I was just giving some background and actual, lived experience, a flavor for what is happening in the civic and corporate worlds, outside your official purview.

Basically, it is just too slow, and you got that message.

Thanks.

On Tue, Oct 26, 2010 at 4:49 PM, <Melissa.Anderson@modot.mo.gov> wrote:
Hello Mr. Duff,

I hope that you see more improvements in accessibility take place at a faster pace in the future. MoDOT is committed to a stronger effort with our current and future projects. It sounds like many of the issues you are encountering are with local businesses. I suggest you talk to someone at the City about your concerns. Some of these issues may violate local building codes. The Governor's Council on Disabilities should be able to guide you in how to file a complaint, if you feel it is necessary. If you have concerns on a specific state road project, please contact our local staff, or me. We can look into the matter for you.

Thank you for taking time to submit your comment.

My comment is brief:

The strategy of addressing problems not related to new road construction just seems so very, very slow. And if you are in a wheel chair, the barriers are insurmountable without someone coming to your "rescue". You only encounter them as you go, they are not often anticipated in advance.

Perhaps the obvious barriers, known barriers, could be listed on a website so people with mobility related disability could plan their movements better.

I saw some local Joplin and SW Missouri barriers erected during new construction where access was good prior to the construction. I don't see many "detours" planned out for the during construction periods either. An example: Joplin's Wildcat Park nature center removed access to Shoal Creek where people with disabilities were able to go fishing, and now they can't. The people at the center said they were not a public facility so they don't have to do anything about it. But they are in a public park just off of a state highway. Another example: Joplin's downtown parking lots do not have direct access to the stores nearest the parking lots. A person has to wheel clear around the block to get in those stores. Plus the stores are putting dumpsters in the way without regard to how it impedes access. I spoke to the City Mgr's office without any resolution of the issue. I've seen McDonalds' in Camdendton and the auto parts stores, several of them, the Radio Shack, the big tire store, and other merchants remove accessible parking to inaccessible locations when they re-striped their parking lots. I spoke to the paving/ striping contractor and he took delight, glee, in refuting my comments and saying that the re-striping was done on purpose to reduce the access. The big tire store said they weren't going to do anything about it and that was that, because they could always "help" someone if they called ahead.

Subject Sidewalk curb cuts- From Mike Fredholm

Rick- You mentioned for us to forward any sidewalk issues to you at our last Streetscape subcommittee. I ranked some curb cuts that have been causing me trouble. The 5 star ones I really would like action on if possible- the lack of these cuts force me into the roadways in dangerous situations.

Also, I was tickled to see the 3rd Street Corridor on your list of projects- re doing this streetscape/roadway with particular attention to reducing heavy truck/traffic flow will be a HUGE help in the River Market. I have had 18 wheelers lock up their brakes trying to slow down for me in a marked crosswalk, 3rd and Main St.

Best Regards, Mike Fredholm

Here's the curb cut list:

I looked at where I roll around the River Market and up to 9th and 10th streets. There are the top hitters.

5 Stars
1. Independence - Main/Delaware 3 of the corners need curb cuts - the S/E, S/W, and N/E corners. This Bridge between Delaware street and up into the city is not curb cut. Consequently, you roll in the street and due to the crown in the road, can't see oncoming cars until they are right on you, and because of the cement jersey barriers, you can't get out of the way!! VERY DANGEROUS

2. 7th and Main - The City side of the same bridge from above. Both sides of Main St. need curb cuts leading on to the bridge and crosswalk paint.

4 Stars

3. Independence - Wyandotte - S/E corner - This bridge I use a lot to get to the Broadway end of town. Also, on each side of Wyandotte on this bridge that crosses 70/35 there is a huge bump that was tried to be filled by an asphalt patch but has heaved. There are 2 spots on both the E side and the W side.

4. 3rd and the 9 Freeway(Heart of America Bridge) offramp - North side of 3rd st. (S/E corner of Cold Storage Lofts)
This is a route to Caddyshack and the new 9 bike lane to North KC and causes me to roll in 3rd street. There is no option on the other side of the street.

5. 5th st between Oak and Locust - North side of the street. There is a alleyway into Le Fou Frog without curbcuts- It needs 2 cuts. I end up in the street a lot as I roll along here, and cars move fast on 5th st.

6. 5th st and Locust - N/W corner needs a curb cut

3 Stars
7. 3rd Street and Oak - S/E corner (Really all this sidewalk along 3rd street from the 9 freeway to Grand on the South side needs redone)

8. Walnut between 7th and 8th on the East side- There is an alleyway without 2 curbcuts that force me into the street.

9. 7th St. between Walnut and Main on the South side - An alleyway is without 2 cuts - For some reason, I go to CVS and try going on this sidewalk, and have to backtrack when I reach this barrier.

Melissa,

Thank you for your reply to my concerns. I am disappointed, however, that you don't directly have authority over Transit, for this is the area which concerns me the most. You say you are sure that the people responsible for providing Transit to the masses want to know the issues and problems its disabled patrons encounter with its facilities and services. Unfortunately, I find this to be untrue.

Since I live in St. Louis, I can only speak for the treatment I have received from Metro (Bi-State) since I moved here thirteen years ago. Within the first year and many times subsequently, I was in contact with Metro's ADA Director, Patricia Hall, informing her of issues I and other blind patrons were experiencing. She expressed interest and gratitude for my concerns and the possible solutions I presented. Most solutions are at a zero cost or minimal cost premium because they would require a modest change in company policy. For example: Bus operators should stop at ALL bus stops where a person is presently occupying a space at the bus stop rather than requiring a potential passenger to make eye contact or otherwise signal the operator that a ride is requested. Currently, bus operators need only stop if there is an overt indication that the person at the bus stop wants the bus to stop. This, Metro tells me, is because many pedestrians use bus stop benches to "rest." When asked how a blind patron is supposed to know a bus is approaching a bus stop so an operator may be "signaled" to stop, no solution is offered and the policy remains in place.

Four years ago I complained about this and other issues to MCHR whereupon they found "cause" for action against Metro. In other words, for the past four years Metro has been on notice from the State of Missouri that they have failed to comply with Missouri's laws. Has Metro made an effort in good faith to correct the problems? No. They have decided to wait as long as possible and until they are forced to comply.

Sincerely,

Scott Gustafson

On Nov 1, 2010, at 10:47 AM, Melissa.Anderson@modot.mo.gov wrote:

> Hello Mr. Gustafson,
>
> Thank you for taking time to review MoDOT's Transition Plan and to provide us with comments. Because many of your comments address problems with transit, I am also forwarding this note to

our Director of Transit, so that he may pass your concerns on to local transit agencies when opportunities arise. MoDOT does not operate the buses or MetroLink, but we do partner with the organizations frequently.

If there are specific locations where you encounter problems, please use the Location Survey to let us know where they may be, if you haven't already done so. Here is a link back to the Transition Plan web page for your convenience. It will be available until the end of the week. -
http://www.modot.org/adatransitionplan/

I understand your frustration with "locked door" scenarios. Please let the appropriate people know when you encounter such situations, they/we may truly be unaware that there are needs that are not being met. MoDOT wants our facilities and services to be available to all users and try our best to meet the current ADA standards, but if something can be done differently to meet the needs of specific users, we will do our best under the given situation, if we are aware there is an issue.

If you have problems using the survey, fell free to contact me directly and I will be happy to help, or you can send me a list of problem locations and I will enter them and pass them on to our local staff.

Again, thank you for your time,
Melissa

Subject: ADA Transition Plan Comments

Comments: People who are blind have the highest hurtles to overcome due to the least amount of accessibility to public transportation and public facilities. Why? Because 80 percent of all information of one's environment is obtained through visual stimuli. And public transportation and facilities rely on visual stimuli to inform the public. So when I say accessibility, do I mean physical access? No. I mean access to information required to utilize the public systems and facilities already in place. How is a blind person supposed to catch a bus if he/she isn't informed of the bus stop

location? How is he/she supposed to purchase a ticket to ride the MetroLink if the location of the TVM and Validators are hidden from them? How is he/she to know when to disembark if they don't know where they are? And how is he/she supposed to know when to catch the train or bus if schedules and timetables are not in a media format they can understand?

Another aspect of the ADA which is often misunderstood is "compliance." I'm sure there are areas you (MoDOT) have marked as compliant because they appear to be in compliance. However, not everything is as they appear so the "locked door" test must be applied. A wheelchair ramp appears to make a building "accessible" because it allows people to bypass a flight of stairs, thereby making it seem to be "compliant." But the ADA doesn't consider it compliant if the wheelchair ramp leads to a locked door. Additionally, a talking TVM or PA announcement is not compliant with the ADA if the speaker volume is set too low to hear or the announcement is unintelligible. Not applying the "locked door" test to ensure "compliance" will result in higher costs to the taxpayer due to costs associated with re-engineering and re-construction. It is always cheaper to do it right the first time than it is to fix mistakes at a later date.

What is the best way to help ensure compliance for blind patrons? Standardization is the key. Place bus stops in the same block location. Standardize light rail stations by making "central" instead of "split" platforms and place TVMs, validators, and PATs in the same location at all stations. Make all operators announce each stop clearly and intelligibly (locked door test). Standardization allows blind and other disabled people to learn (gain information) one area and apply their knowledge to other areas, giving them greater independence.

Subject: Re: ADA Transition Plan Comments

Hello Mr. Gustafson,

Thank you for taking time to review MoDOT's Transition Plan and to provide us with comments. Because many of your comments address problems with transit, I am also forwarding this note to our Director of Transit, so that he may pass your concerns on to local transit agencies when opportunities arise. MoDOT does not operate the buses or MetroLink, but we do partner with the organizations frequently.

If there are specific locations where you encounter problems, please use the Location Survey to let us know where they may be, if you haven't already done so. Here is a link back to the Transition Plan web page for your convenience. It will be available until the end of the week. -
http://www.modot.org/adatransitionplan/

I understand your frustration with "locked door" scenarios. Please let the appropriate people know when you encounter such situations, they/we may truly be unaware that there are needs that are not being met. MoDOT wants our facilities and services to be available to all users and try our best to meet the current ADA standards, but if something can be done differently to meet the needs of specific users, we will do our best under the given situation, if we are aware there is an issue.

If you have problems using the survey, fell free to contact me directly and I will be happy to help, or you can send me a list of problem locations and I will enter them and pass them on to our local staff.

Again, thank you for your time,
Melissa

Comments: As a gimp that's wheelchair bound 7/24, I think we're just not really thinking through how we live thoroughly enough. Be it inclines into buildings or sidewalks that have stuff blocking our way, I just don't think the needs of the gimp is being looked at closely enough. It's very common for me to not have any place on streets or even in parking lots where I can open my handicap van doors and lower the ramp so I just have to turn around and go home and pray the next time I'll be lucky enough to get into wherever I was wanting to go. We need to make laws that give handicap parking that's designed for vans with electric ramps/lifts to have a wider spot. Meanwhile we see people with handicaps but who have no idea about what it's like to live in a wheelchair taking these precious few parking spaces. I'm sorry folks, but I just need a little more room here. Sidewalk parking and getting around is often a nightmare. I'm not asking for a handout, but a helping hand would be nice. I know that being forced to deal with handicapped people like me is annoying for others - I'm one of them, so please just give a little bit of consideration. That's all I ask.

Good Morning Mr. Baker,

Thank you for your comment. Improvements are required on state and federal projects, but the details of what and when they are required are complicated. MoDOT administers federal money for highway projects and requires the appropriate work to be done. We are also working harder as a department to include more work in state funded projects and to plan for more stand alone pedestrian projects.

I encourage you to complete the location survey to let us know if there are specific areas where you encounter obstacles. If you have already done so, thank you. If you have any problems or additional questions, please do not hesitate to contact me directly.

Thank you,
Melissa

Hi Sheila,

Matt and I just spoke. He meant that the survey would not be up much longer. It was only intended to be posted until the end of the month, so we'll keep it up as planned. There are several ways that someone who has difficulties can get assistance. Matt and I are available and all of our district customer service staff have been advised that the web page may generate requests for help.

If you know of anyone having problems, please send them to one of us.

Thank you again,
Melissa

View: (Mail Threads)

Hello Sheila,

Thank you for taking time to review MoDOT's Transition Plan and your comments on behalf the Whole Person. You mentioned a desire for prioritization that includes requests. This is an area that was discussed at length and is not specifically included because it is generally addressed as a part of providing customer service unless it involves extensive construction or design and then the area will be considered for future project work. We are attempting to identify specific locations of need through the location survey and location map on the website. People encourage your clients to let us know where they are encountering obstacles. If they have any problems, they can contact our customer service representatives at 1-888-ASK-MODOT, or they can call me directly at 573-526-2921 and I will be happy to provide assistance.

As far as removing non-compliant items from the list because they are technically infeasible, MoDOT will always remain responsible for accessibility to our services. As technology progresses we will have opportunities to make further improvements the next time we have an alteration project in an area. We anticipate re-evaluating our system on a regular basis and will also complete specific reviews with each new project.

Thank you again for your time and your input. Please let me know if you have additional comments or questions.

Comments: The Whole Person, a Center for Independent Living in Kansas City, appreciates the opportunity to comment on MoDOTs transition plan. We connect people with disabilities to the resources they

need, and transportation is essential to accessing employment and all other aspects of daily living. The Whole Person is in favor of MoDOTs plans to prioritize making all its public buildings accessible according to frequency of use and to the greatest extent possible by 2015, many years in advance of the plans 2027 end date. We are also pleased at MoDOTs efforts to put the needs of the public ahead of bureaucratic considerations by committing to improve its sidewalks, traffic signals and intersections regardless of inventory errors which may have occurred in 2007 surveys. We are appreciative of efforts to increase input from people with disabilities as improvements are added following the initial three years of set and budgeted upgrades, including high risk areas, high volume public use areas, accessibility needs, public requests, and removal of barriers, intersections and sidewalks. The Whole Person applauds prioritization based on degree of public use, however, also encourages request processes to be utilized. We appreciate the accountability and tracking measures MoDOT is undertaking. The Whole Person has a concern with permanently removing items for upgrade which are currently deemed not feasible, as future circumstances or new remedies could make reassessment a more feasible option, thereby increasing accessibility to MoDOTs programs, services and facilities for all, including people with disabilities and older Missourians.

Melissa,

I have been in contact with Mat Hiebert about the surveys. I tried the accessibility survey and the text version of the location survey and did experience difficulties. Text would repeat itself so that it was difficult to ascertain whether check boxes had in fact been checked. The Jaws (speech) cursor would jump location, and because of all the repetition, it was difficult to get back to where I was. Mat said he would work on this. However, when I checked out the surveys for a second time this morning, they still weren't functioning optimally, at least with my setup.

I really enjoyed the ADA symposium and hope I am able to attend in 2011.

Thank you Sheila. Yes, we met at a meeting in Kansas City. I saw you at the ADA symposium in Denver, but never had a chance to catch up to you and say hi.

We haven't had many comments or visits to the website and I am a little concerned that no one is taking time to look at the Transition Plan, so I really do appreciate your input.

I know that you have a visual disability. Can you tell me if you had any problems using our web site? We worked very hard to make it accessible and we knew the location map survey would not be easily used by people who did not see well, so we also created a text version. I haven't heard any feedback about problems, but I am curious if you had any difficulties or if we could have done something different to make it more accessible.

Again, thank you,
Melissa

Hello Ms. McElhany,

Thank you for submitting your comment on MoDOT's Transition Plan. Traffic signals sometimes need to be adjusted to meet the needs of pedestrians. If you have not already done so, please fill out the location survey on the Transition Plan website and let us know the locations of intersections where you need more street crossing time. If you need assistance in using the Location Map, feel free to contact me and I would be happy to help. You can also just send me a list and I will enter them and forward it to our local staff.

Here is a link to the web page, for your convenience.

Forwarded on behalf of the Missouri Department of Transportation.

Hello,

If you are receiving this note as an organization who represents people with disabilities, please forward it to your members, or clients.

This is a reminder that Missouri Department of Transportation has made it's Transition Plan available for public comment until October 31. It can be found at the following website and is also available at MoDOT's Central Office and each of the district offices.

http://www.modot.mo.gov/ADAtransitionplan/index.htm

The Transition Plan is MoDOT's plan to make its facilities, such as buildings and parking lots, and right of way facilities, such as sidewalks and intersections, accessible to all users, including people with disabilities. Two surveys are also available on the web site to help the department prioritize projects.

Very few comments and survey responses have been received. Please take a few minutes to review the Plan and provide comments, and to take the surveys.

For assistance in reviewing the documents or completing the surveys please contact our customer service representatives at *1-888-ASK MoDOT (1-888-275-6636).* Melissa Anderson, Non-motorized Transportation Engineer, is also happy to provide assistance Monday through Friday, 8 to 5.

Subject: Missouri Dept. of Transportation is seeking comments on the Transition Plan

Forwarded on behalf of the Missouri Department of Transportation.

Hello,

If you are receiving this note as an organization who represents people with disabilities, please forward it to your members, or clients.

This is a reminder that Missouri Department of Transportation has made it's Transition Plan available for public comment until October 31. It can be found at the following website and is also available at MoDOT's Central Office and each of the district offices.

http://www.modot.mo.gov/ADAtransitionplan/index.htm

The Transition Plan is MoDOT's plan to make its facilities, such as buildings and parking lots, and right of way facilities, such as sidewalks and intersections, accessible to all users, including people with disabilities. Two surveys are also available on the web site to help the department prioritize projects.

Very few comments and survey responses have been received. Please take a few minutes to review the Plan and provide comments, and to take the surveys.

For assistance in reviewing the documents or completing the surveys please contact our customer service representatives at *1-888-ASK MoDOT (1-888-275-6636).* Melissa Anderson, Non-motorized Transportation Engineer, is also happy to provide assistance Monday through Friday, 8 to 5.

Melissa A. Anderson, P.E.
Missouri Department of Transportation
Non-Motorized Transportation Engineer
